

# JUITA

Jurnal Informatika

Vol. 11 No. 1, May 2023

---

## PREFACE

Assalaamu'alaikum Wr. Wb.

With thanks to Allah, JUITA Volume 11 Number 1, which is the first issue in 2023, has been able to be presented to the readers of academics, practitioners, and students. In this edition, we present research articles in the context of classification, forecasting, and evaluation, covering the fields of machine learning, software engineering, natural language processing, image processing, data mining, IoT, decision support systems, and information retrieval. Our gratitude goes to all those who have helped, especially to the authors, the editorial board and reviewers, and the technical editor team, for your willingness to take the time to prepare the manuscript for this journal.

As in the previous issue, we need to say that JUITA is published twice a year (2 numbers), namely in May and November. JUITA manuscript used IMRAD model. Starting from Volume 9, JUITA uses the language of instruction for the manuscript in English. To maintain consistency and editorial quality, JUITA adopts the IEEE format with modifications to the font size and layout. Likewise, writing citations and references using the IEEE style. We sincerely hope that the criticism and suggestions from readers will be for improvement for the sake of improving the quality of this journal.

Wassalaamu'alaikum Wr. Wb.

Editor in Chief.

## TABLE OF CONTENT

i.	Cover	
ii.	Editor Preface	
iii.	Table of Content	
	The Automatic Classification System for Academic Performance Evaluation at the Faculty of Information Technology Atma Jaya University of Makassar <i>Erick Alfons Lisangan, Dwi Marisa Midyanti, Chairul Mukmin, Astrid Lestari Tungadi.....</i>	1
	NS-SVM: Bolstering Chicken Egg Harvesting Prediction with Normalization and Standardization <i>Aji Gautama Putrada, Nur Alamsyah, Muhamad Nurkamal Fauzan, Syafrial Fachri Pane .....</i>	11
	Designing a Chatbot Based on Full-Text Search and 3D Modelling as a Promotional Media <i>Sevtian Ferdian, Aditiya Hermawan, Edy Edy.....</i>	19
	Aspect-Based Sentiment Analysis for Indonesian Tourist Attraction Reviews Using Bidirectional Long Short-Term Memory <i>Dwi Intan Af'idah, Puput Dewi Anggraeni, Muhammad Rizki, Aji Bagus Setiawan, Sharfina Febbi Handayani.....</i>	27
	Monitoring the Performance of Lecturers Using Behaviorally Anchor Rating Scale and Management by Objectives Method <i>Muhammad Sabiq Dzakwan, Sunardi Sunardi, Anton Yudhana .....</i>	37
	Artificial Intelligent for Human Emotion Detection with the Mel-Frequency Cepstral Coefficient (MFCC) <i>Anita Ahmad Kasim, Muhammad Bakri, Irwan Mahmudi, Rahmawati Rahmawati, Zulnabil Zulnabil.....</i>	47
	Evaluation of Bicluster Analysis Results in Capture Fisheries Using the BCBimax Algorithm <i>Cynthia Wulandari, I Made Sumertajaya, Muhammad Nur Aidi.....</i>	57
	Comparison of Classification Methods on Twitter Sentiment Analysis of PDAM Tugu Tirta Kota Malang <i>Anisa Dewi Anggraeni, Muhammad Farhansyah, Muhammad Risky Pratama Hermawan, Galih Wasis Wicaksono, Christian Sri Kusuma Aditya .....</i>	67
	Resampling Technique for Imbalanced Class Handling on Educational Dataset <i>Anief Fauzan Rozi, Adi Wibowo, Budi Warsito .....</i>	77
	Information System Strategic Planning at Institut Agama Islam Negeri Ternate <i>Sudarman Sudarman, Asmarani Pratama Y. Hadad, Abd. Haris Abbas.....</i>	87
	Electroencephalogram as a Validation Method in Usability Testing <i>Guntur Maulana Zamroni, Dinan Yulianto, Bella Saphira, Fadel N. Akhmad, Fakhira A. Zahrah.....</i>	97
	Image Classification On Garutan Batik Using Convolutional Neural Network with Data Augmentation <i>Leni Fitriani, Dewi Tresnawati, Muhammad Bagja Sukriyansah .....</i>	107

A Smart Greenhouse Production System Utilizes an IoT Technology <i>Choirul Huda, Bety Etikasari, Pramuditha Shinta Dewi Puspitasari</i> .....	117
Selection of TikTok Content Based on User Engagement Criteria Using the Analytic Hierarchy Process <i>Citra Wiguna, Sri Mulyana, Retantyo Wardoyo</i> .....	125
Decision Support System for Suitability of Horticultural Agricultural Plant Types with Land Conditions Using Interpolation Profile Matching <i>Petrus Wolo, Sri Mulyana, Retantyo Wardoyo</i> .....	133
Smart Parking System Model Analysis with NodeMCU and IoT-Based RFID <i>Sandhy Fernandez, Yetman Erwadi, Faisal Erlangga</i> .....	145
K-Means Clustering for Grouping Rivers in DIY based on Water Quality Parameters <i>M. Andang Novianta, Syafrudin Syafrudin, Budi Warsito</i> .....	155
